Allowable Subject Matter

1. Claims 1-10 are allowed.

The following is an Examiner's statement of reasons for allowance:

The closest prior art is Vollmer (U.S. Patent No.: 6,064,689) and Dell-Imagine (U.S. Patent No.: 5,517,688) which are IDS documents of record. Vollmer teaches: a code division multiplex receiver in a mobile which receives a combined data signal over shared spectrum, samples the combined signal, estimates the channel response for the combined signal and determines the cross correlation matrix using the estimated channel response per col. 2 line 22-col. 3 line 38 and per col. 4 line 5 line 24 respectively. Dell-Imagine teaches: sampling the combined signal at multiple chip rates per col. 1 lines 22-25.

Claims 1-10 are considered allowable since when reading the claims in light of the specification, none of the references of record alone or in combination disclose or suggest the combination of limitations specified in the independent claims including:

"means for determining a padded version of a spread data vector of a size corresponding to multiple chip rate using a column of the channel response matrix, the estimated channel response matrix, the samples and a Fourier transform; and means for estimating the spread data vector by eliminating elements of the padded version so that the estimated spread data vector is of a size corresponding to the chip rate" as specified in claim 1

"a single user detection device for determining a padded version of a spread data vector of a size, corresponding to the multiple chip rate using a column of the channel response matrix, the estimated channel response matrix, the samples and a Fourier transform, and for estimating the

spread data vector by eliminating elements of the padded version so that the estimated spread data vector is a size corresponding to the chip rate " as specified in claim 6.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert W. Wilson whose telephone number is 571/272-3075. The examiner can normally be reached on M-F (8:00-4:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Doris To can be reached on 571/272-7629. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
